EXPERIENCE

Independent Product Designer & Developer
Sep 2025–Present · New York, NY
Independent practice shipping AI-powered consumer products and browser tools.

- Designed, developed, and launched yap ↗, an AI voice messaging app with topic segmentation, seamless playback, and contextual replies, in six weeks using Next.js, Supabase, and OpenAI APIs.
- Built and published Notate ↗, a browser extension on the Chrome Web Store that lets users attach draggable annotations to individual webpage elements and revisit ideas in their original context.

Regular People, Digital Designer (Freelance)
Aug 2025–Present · New York, NY
Creative studio specializing in theatrical production, marketing, and advertising.

- Led digital marketing design for 11+ Broadway and Off-Broadway productions, creating 50+ assets across paid social, email, sponsorships, and promotions.
- Adapted production identities into campaign creatives featured in Playbill, The New Yorker, and Time Out, maintaining visual consistency across digital, print, and editorial placements.

Meal Village, Product & Visual Designer (Contract)
Sep 2022–Mar 2023 · Chicago, IL
Chicago-based meal delivery startup with a 14K+ subscriber audience.

- Designed landing page experiences and mobile product prototypes, adapting web-based meal discovery and ordering flows into responsive interfaces.
- Developed investor presentations, product mockups, and user storytelling assets to support fundraising, increasing demo engagement by 20%.

Jellysmack, Product Designer (Freelance)
Aug 2022–Mar 2023 · Remote
Creator technology company for content distribution, analytics, and monetization.

- Defined information architecture, navigation, and interaction models for a creator analytics platform, translating reporting requirements into user journeys and prototypes.
- Designed YouTube analytics and A/B testing workflows for a network of 500+ creators, visualizing performance benchmarks, content optimization opportunities, and experiment results.
- Collaborated with engineers and stakeholders to translate requirements into high-fidelity wireframes, prototypes, and development handoffs.

AMA Digital, Lead Designer
Oct 2021–Jul 2022 · Evanston, IL
Creator analytics company (60M+ combined subscribers); acquired by Jellysmack.

- Led brand identity and website design, establishing a cohesive visual system across marketing campaigns, presentations, and branded materials.
- Mapped creator analytics workflows across YouTube APIs, BigQuery, and Tableau, identifying reporting inefficiencies and defining user journeys for a centralized analytics platform.
