Designed an AI wearable for capturing inspiration; led AI systems and interactive prototyping in 72 hours.

EXPERIENCE

Independent Product Designer & Developer
Sep 2025 - Present · New York, NY
Independent practice designing and shipping AI-powered consumer products and browser tools.
- Independently designed, developed, and launched yap ↗ in six weeks, an AI-powered voice messaging app featuring topic segmentation, continuous audio playback, and contextual replies, built with Next.js, Supabase, and OpenAI APIs.
- Designed, built, and published Notate ↗ to the Chrome Web Store, enabling users to attach draggable annotations to individual webpage elements and revisit ideas in their original context.

Regular People | Digital Designer (Freelance)
Aug 2025 - Present · New York, NY
Creative studio specializing in theatrical production, marketing, and advertising.
- Led digital marketing design across 11+ Broadway and Off-Broadway productions, creating 50+ cross-channel assets for paid social, email campaigns, sponsorships, and promotional materials.
- Adapted production identities into campaign creative featured in Playbill, The New Yorker, and Time Out, maintaining visual consistency across digital, print, and editorial placements.

Meal Village | Product & Visual Designer (Contract)
Sep 2022 - Mar 2023 · Chicago, IL
Chicago-based meal delivery startup with a 14K+ subscriber audience.
- Designed landing page experiences and mobile product prototypes, adapting web-based meal discovery and ordering flows into responsive interfaces.
- Developed investor presentations, product mockups, and user storytelling assets to support fundraising, increasing demo engagement by 20%.

Jellysmack | Product Designer (Freelance)
Aug 2022 - Mar 2023 · Remote
Creator technology company specializing in content distribution, analytics, and monetization.
- Defined information architecture, navigation, and interaction models for an internal creator analytics platform, translating complex reporting requirements into user journeys and interactive prototypes.
- Designed YouTube analytics and A/B testing workflows for a network of 500+ creators, visualizing performance benchmarks, content optimization opportunities, and experiment results.
- Collaborated with engineers and cross-functional stakeholders to translate reporting requirements into high-fidelity wireframes, interactive prototypes, and development handoff documentation.

AMA Digital | Lead Designer
Oct 2021 - Jul 2022 · Evanston, IL
YouTube growth and analytics company serving creators with 60M+ combined subscribers; acquired by Jellysmack in 2022.
- Led brand identity and website design, establishing a cohesive visual system across marketing campaigns, presentations, and branded materials.
- Mapped creator analytics workflows across YouTube APIs, BigQuery, and Tableau, identifying reporting inefficiencies and defining user journeys for a centralized analytics platform.
